

- ✓ **PLANNING FOR SUCCESS**
- ✓ **DELIVERING QUALITY SOLUTIONS**
- ✓ **REVIEWING FOR OPTIMIZATION**

We offer a full suite of HSE personnel services and equipment options from the pre-project planning stages, to onsite delivery, to post project success and improvement analyzation.

Contact us today for your FREE custom project safety evaluation and system design.

WHAT WE OFFER

- HSE Project Planners
- Site Safety Advisors
- Respiratory Technicians
- Rescue Specialists
- Breathing Air
- Gas Detection
- Confined Space
- High Angle
- Covid Protection

STEP #1 - THE "PLAN"

During this stage, at no cost, we meet with you in office and on project so we can understand the overall project needs, challenges, and objectives. If possible, we will include our onsite leadership and any people in critical roles to start the safety team relationship and establish the start of a safe and productive project.

STEP #2 - THE "DO"

After the identification of your safety personnel and equipment needs, we will build a service delivery plan with costs suited to your custom project. Rescue plans can also be developed during this portion for your review and confirmation.

STEP #3 - THE "CHECK"

Upon package and cost acceptance, we confirm all safety personnel, equipment, and rescue planning designs, mock scenario, and timeline the delivery. We then meet with you again at no cost to ensure exact service delivery prior to start.

This stage also appears during "The Act" as we consistently mentor and apply QA project checks.

STEP #4 - THE "ACT"

KSGI arrives onsite and takes care of your people and projects specific protection so you can rest easy.

Post project completion, we again meet at no cost to make sure our systems were optimal for your project, and so your feedback can be implemented for future operations.
