

## EXPERT RESCUE SOLUTIONS FOR PROJECTS WITH CRITICAL SLOPE HAZARDS

Our Steep Slope Rescue teams and equipment are second to none and one of our proud flagship service lines. Custom trained specialists, enhanced by cutting edge equipment and support systems, are your solutions for low to high rating slope hazards.

### WHAT WE OFFER

- Rescue Teams
- Rope Rescue Systems
- Mobile Rescue Units
- QA/QC Support & Reporting
- ERP Design & Hazard Assessment
- Fitness for Duty Designed and Monitored by Certified Trainers
- Combined Service Project Rescue Demonstrations

Alberta Construction  
Safety Association

## SPECIALIZED RESCUE TEAMS & SLOPE SPECIFIC TRAINING

Our teams are trained to the NFPA 1006 standard as a start to their Slope Rescue Specialist career. Over and above, we conduct a 5-day specialized course that is designed for the unique requirements in steep slope scenarios. This includes rope rescue, packaging, vehicle extrication, and vehicle bracing systems focused on vehicles and heavy equipment rollovers.

## ULTRALIGHT RESCUE EQUIPMENT & CUSTOM MOBILE UNITS

All our rescue equipment is ultra lightweight and designed for steep slope scenarios not seen in regular high angle industrial settings. Due to this, our deployment is faster and less taxing, providing your project with better protection. Our mobile rescue units are designed for winching, 360 degree scene lighting, and mobile anchoring. 1 ton cab/chassis with bed pullouts are designed for rugged terrain and auxiliary support.

## QUALITY ASSURANCE & TECHNICAL PROJECT SUPPORT

Our teams and yours are supported by monthly scheduled visits by our Technical Rescue Leadership. These visits are not to police, but rather to ensure we are providing exactly what your dynamic project needs for optimal coverage. During these visits we offer a rescue demonstration led by your onsite rescue teams and our KSGI leadership. This is a unique and effective opportunity to practice project scenarios and to utilize multiple onsite services that may be impacted in a rescue scenario.
